Docodon

Taxinomia et Latinitas huius stipulae dubiae sunt
Taxinomiam e fontibus fidelibus verifica, in textum seu capsam converte, citationes adde (https://la.wikipedia.org/w/index.php?title=Docodon&action=edit) si potes.

Docodon (binomen a Marsh anno 1881 inventum) est genus mammalium exstinctum.

Systema taxinomicum Animalis

- Imperium: Eukaryota
  - Regnum: Animalia
    - Gradus: Metazoa
      - Subgradus: Eumetazoa
        - Subregnum: Bilateria
          - Infraregnum: Eucoelomata
            - Supraphylum: Deuterostomia
              - Infraphylum: Chordonia
                - Phylum: Chordata
                  - Subphylum: Vertebrata
                    - Infraphylum: Gnathostomata
                      - Supraclassis: Tetrapoda
                        - Infraclassis: Amniota
                          - Classis: Mammaliaformes
                            - Ordo: † Docodonta
                              - Familia: † Docodontidae
                                - Genus: † **Docodon** (Marsh, 1881)
